

To complete the quilt you will need:

Basic sewing supplies, rotary cutter, favorite ruler, mat, and color pencils or crayons in basic colors for designing your blocks.

2/3 yards MAIN fabric for blocks, accent squares & binding  
*In my photo, the MAIN color is red. Students may choose any color.*

1 1/2 yards background color (black or white or neutral grey)  
You will need 2 1/2" strips for piecing and 3" strips for 1/2 square triangles.

2 1/2" scrappy color squares to create your color combinations.  
*For beginning color students, I suggest staying with basic CRAYOLA colors: red, blue, yellow, green, purple and orange. Remember to include light and dark shades of the basic colors, especially light & dark to match your MAIN color.*

24 sash strips, 2 1/2" x 10 1/2" of your background color. (Black, white or neutral) **These do not need to be pre-cut.**

16 Sash Accent squares 2 1/2" x 2 1/2" of your MAIN color. **These do not need to be pre-cut.**

Background fabric for outer border: 4 strips @ 4 1/2" x 45" (black, white or neutral). **These do not need to be pre-cut.**

**NOTE:** Pre cutting 3" strips (or squares) and 2 1/2" strips (or squares) of the background fabric before class helps speed thing up- *this is just a suggestion.* We will begin the day with the power point Color College lecture & trunk show. Following the lecture, students may piece one block so everyone understands how to put the block together. It helps students move along a little bit more quickly if they have a few 3" and 2 1/2" squares cut before class. The goal is to have the first block cut and kitted (or pieced) before lunch. **NOTE: if every student is comfortable stitching half-square triangles, it is not necessary to bring a machine to class as we won't need to stitch the first block.**

After lunch, the goal is to cut and design the remaining 8 blocks. I will provide a coloring page & small sandwich bags. As each blocks is designed, you will transfer your design to your coloring page (or take a photo of your block) and seal your block pieces into a sandwich bag to be stitched later. You will go home with at least one completed block, and have the rest of your quilt designed and ready to stitch as a ready-made pre-cut kit.
